PROFILE

Computer Science and Engineering undergraduate at SRM University-AP with an interest in software development and practical problem-solving. Building programming skills through academic learning and hands-on projects, with a focus on developing useful applications and clear, reliable solutions.

EDUCATION

SRM University-AP
B.Tech-Computer Science and Engineering(2025-2029)
CGPA-9.67

PROJECTS

Vehicle Rental Management System
• Developed a vehicle rental management application using C++.
• Technologies: C++.
Expense Tracker
• Developed an application in Java to record and organize expenses.
• Technologies: Java.
LANDGUARD AI — GIS & Geospatial Intelligence
• Student innovation project involving geospatial analysis and mapping workflows for land/infrastructure risk exploration.
• Tools discussed: QGIS, GeoPandas, PostGIS, Leaflet/GeoJSON.
Campus Connect — Student Web Application Concept
• Student-focused application concept for organizing campus information and academic tasks.
• Technologies: HTML, CSS, JavaScript; React (learning).

TECHNICAL SKILLS

Programming	:C++,Java,Python basics
Web	:HTML,CSS,Javascript basics,React(basics)
Tools	:Git and Github
Core areas	:Data structures and problem solving

AREAS OF INTEREST

Software Development, Web Development ,Data Structures and problem solving
